05 - READ ACL

Created the script-controlled READ ACL.

Work Completed

• Opened System Security → Access Control (ACL).

• Elevated the Security_admin role.

• Created a record ACL for Operation: read.

• Name: u_institution_details.

• Set Active to true and Advanced to true.

• Added bb1 under Requires role.

• Added Data condition: Branch is EEE.

• Used a script that allows admin access, allows bb1 users, and denies others.

• Saved the ACL.

• Tested by impersonating the EEE user and Admin.

GitHub Documentation Note

Script used:

```
  (function () {
```

if (gs.hasRole('admin')) return true;

if (gs.hasRole('bb1')) return true;

return false;

})();
