08 - DELETE ACL & Final Verification

Completed the DELETE ACL and verified the complete permission flow.

Work Completed

• Created a new record ACL.

• Operation: delete.

• Name: u_institution_details.

• Set Active to true.

• Added bb4 under Requires role.

• No Data condition was required.

• Saved the ACL.

• Verified the final permission set with bb1, bb2, bb3 and bb4.

• Final mapping: bb1 → READ, bb2 → CREATE, bb3 → WRITE, bb4 → DELETE.

• Admin retains full access.

• The completed ACL setup demonstrates record-level security across viewing, creating, editing and deleting.

GitHub Documentation Note

Final result: users with all four roles can view, create, edit and delete the permitted EEE branch records.
